

Sports Production for the Touchscreen Age

Varsity Sports Bundles are designed specifically for schools that want to easily produce high-quality live sports. At the core of the Varsity Bundles is the Simplylive ViBox production platform - a new generation of advanced video technology that features a suite of flexible and intuitive applications for live multi-camera/multi-source productions. Schools and teams can choose and configure applications for mixing, streaming, recording, replay, review, and more. The platform's touchscreen interface is designed for storytelling and high-quality show production. Anyone can learn to use it in a few minutes – and it's simple enough to produce live sports with just one person.

Varsity Bundles in Brief:

- ▶ One hardware platform configurable for multiple applications and combinations of professional capabilities
 - ▶ An all-in-one production solution with applications for video mixing, camera switching, live NDI graphics overlay, replay, and audio mixing
 - ▶ A cost-effective video review solution for official replay and for coaching analysis
 - ▶ A super slow-motion replay system for in-game production and highlights creation
 - ▶ A single-channel production controller for adding audio or graphics to downstream program feed
- ▶ All bundles include a compact hardware unit optimized for 4 - or 6 - camera setups—and supporting baseband, IP, and hybrid workflows.
- ▶ A simple setup requires adding just cameras and touchscreen monitors to get started.

ViBox All-In-One - Complete Sports Production

Overview

- ▶ Portable and compact 6-camera video mixing – with audio mixing, NDI graphics overlay, replays & highlights with super slow-motion recording/playback
- ▶ Intuitive touch screen UI that's easy to learn and use, empowering the next generation of operators and optimized for one operator production

The ViBox All-In-One Varsity Bundle Includes:

- ViBox 8 Mini (rack ears included)
- All-In-One Control Software
- SloMo Control Software
- Super SloMo Option
- BMR Software
- Audio Software
- Xport Software

Additional System Benefits

- ▶ The Flexible I/O in the ViBox 8 Mini allows you to add up to 6 cameras either SDI or NDI including embedded audio for each camera
- ▶ Looking to build custom graphics for your show? Build them in your choice of an outboard NDI capable graphics system and integrate them directly into the All-In-One interface
- ▶ Want to minimize the amount of equipment you bring to a location? The ViBox Mini hardware can be rack mounted in your machine room with the UI extended to your production location via ethernet with the addition of an optional PC

ViBox SloMo Varsity Bundle - Replay System

Overview

- ▶ Easy-to-use 6-camera replay & highlight system
- ▶ Super slow-motion recording (standard); comprehensive logging and playlists, import and export of media
- ▶ Modernized touchscreen user experience in a portable, compact unit
- ▶ Optional hardware controller available

The ViBox SloMo Varsity Bundle Includes:

- ViBox 8 Mini (rack ears included)
- Super SloMo Option
- SloMo Control Software
- Export Option

Additional System Benefits

- ▶ Look like the pros and boost your program's production value by adding extensive replay and highlights to your show including super slow motion effects
- ▶ Control your program's content with comprehensive playback functionality and have it available for playback with a tap of the screen
- ▶ Easily add your ViBox SloMo system to your production workflow. ViBox SloMo integrates directly with the ViBox All-In-One system with the addition of an optional PC
- ▶ Want to minimize the amount of equipment you bring to a location? The ViBox Mini hardware can be located in the rack in your machine room with the UI extended to your production location via ethernet with the addition of an optional PC

RefBox 4 Varsity Bundle - Multi-camera Video Review System

monitor not included

Overview

- ▶ Portable and cost-effective 4-camera video review solution for officials, teams and coaches
- ▶ Continuously record up to 4 cameras in full HD quality, with loop recording for uninterrupted recording
- ▶ Review instantly on the sidelines or remotely, with pinch-and-zoom on any video screen to identify detail
- ▶ Export and save critical situations - including metadata - to external, portable media in standard high-quality formats and then re-import footage for offline referee review and post-game coaching analysis

The RefBox 4 Varsity Bundle Includes:

- ViBox 8 Mini (rack ears included)
- USB Jog Shuttle Controller
- RefBox 4 Control Software

RefBox 8 Varsity Bundle - Multi-camera Video Review System

Overview

- ▶ High quality, compact 8-camera review solution for referee review, sports teams and coach analysis
- ▶ Portable chassis with a rack-mount option to continuously record up to 8 cameras in full HD quality
- ▶ Review instantly on the sidelines or remotely, with pinch-and-zoom on any video screen to identify detail
- ▶ Export and save critical situations - including metadata - to external, portable media in standard high-quality formats and then re-import footage for offline referee review and post-game coaching analysis

The RefBox 8 Varsity Bundle Includes:

- ViBox 8 Mini (rack ears included)
- USB Jog Shuttle Controller
- RefBox 8 Control Software

ViBox Micro - Single Camera, Downstream Turnaround & Production Backup

monitor not included

Overview

- ▶ Portable, high-quality, all-in-one solution for single-camera productions, downstream turnaround or emergency backup for remote productions
- ▶ Liven up single-camera productions with audio or graphics; or input single program feed from game production mix to add game announcer or translator before streaming live

The ViBox Micro Varsity Bundle Includes:

- | | |
|-----------------------------------|----------------|
| ViBox 8 Mini (rack ears included) | Audio Software |
| Micro Control Software | Export Option |

Additional System Benefits

- ▶ ViBox Micro is easy to operate with all feature concentrated in a clear and simple to use touchscreen interface
- ▶ Produce an alternate broadcast quality feed by ingesting incoming live feeds, mix local commentary with multiple tracks of embedded audio and add additional content like graphics, opening sequences and ads
- ▶ Create clips and highlights from a live feed and add them to a program or export them to external digital storage
- ▶ Add up to 4 layers of graphics to your live feed or single camera production from either internal or external live graphics coming in via NDI
- ▶ Stream live feeds directly ViBox Micro for immediate or delayed broadcast
- ▶ Take your Micro on location with its environmentally-friendly hardware chassis that is designed to withstand harsh conditions and constant shipping
